📍 Adambakkam, Chennai -88

Experienced Full Stack Developer with over 6+ years of hands-on expertise in designing, developing, and deploying robust web applications. Proficient in both frontend and backend technologies, adept at collaborating with cross-functional teams to deliver high-quality solutions. Demonstrated ability to adapt to new technologies and methodologies quickly, ensuring the timely completion of projects while maintaining code quality and scalability. Strong problem-solving skills and a passion for continuous learning and improvement.

Experience

GoBumpr - Full stack Developer

2017 - 2022

- Developed web applications using CakePHP, implementing server-side logic and database interactions.
- Designed and maintained databases, ensuring data integrity and performance.
- Collaborated with frontend developers to integrate backend functionality with user interfaces.
- Participated in code reviews and provided technical support to team member
- Transitioned to ReactJS and Node.js development, contributing to the migration of existing applications and development of new features.
- Developed user interfaces using ReactJS, translating designs into high-quality code.
- Built RESTful APIs using Node.js, facilitating communication between frontend and backend systems.
- **Application** : GoBumpr Bridge CRM
- **Skills**: ReactJS, NodeJs, PHP, MySql, HTML, CSS, JQUERY, Javascript, Ajax, Datatables
- **Description**: Bridge CRM application manages customer details sourced from our online advertisements. Our customer representatives interact with these customers, updating their status as needed. If a customer requires service, the request is transmitted to our partner app via API.

KI Mobility Solutions Subsidiary TVS Autmobiles - Full Stack Developer

2022 - present

- Developed user interfaces using ReactJS, translating designs and wireframes into high-quality code.
- Built reusable components and front-end libraries for future use, optimizing for performance across various devices and browsers.
- Implemented server-side logic using Node.js, building RESTful APIs for frontend communication.
- Designed and maintained databases using MongoDB, MySQL optimizing queries for performance and ensuring data integrity.
- Implemented authentication and authorization mechanisms, ensuring application security.
- Deployed applications to cloud platforms like AWS, Azure, or Google Cloud, setting up CI/CD pipelines for automated testing and deployment.
- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.
- Monitored application performance, troubleshooted issues, and scaled applications as needed.
- **Application** : TVS DMS Application | Contract Employee Portal
- **Skills**: ReactJS, NodeJs, CakePHP, MySql, HTML, CSS, JQUERY, Javascript, Ajax, Datatables
- **Description**: The DMS portal serves as a comprehensive platform for managing all aspects related to customer vehicles, from opening job cards to vehicle delivery. It meticulously maintains data throughout the entire process.

Education

- **AJS Nidhi Hr. Sec School** 2012
 - High School
 - Higher Secondary -CSE Department

- **Sree Sastha Insitute of Engg & Technology** 2016
 - Bachelor of Technology, IInformation Technology
 - Class: First Class

Skills

- ReactJS
- NodeJs
- Javascript
- HTML5 / CSS3
- Agile Development Methodologies
- RESTful API Development
- MySql
- PHP

Declaration

I hereby declare that the details which I stated above are true to the best of my knowledge and faith.
